

## Diagnostics and Monitoring

- Global assessment of continuous glucose monitoring (CGM) market
- Commercial assessment of existing and future diabetes biomarkers
- Global corporate strategy for traditional glucose monitoring market
- Reimbursement and pricing strategy for retinopathy imaging diagnostic
- Commercial plan for non-invasive glucose monitoring system
- US sales forecast for innovative inpatient CGM system
- Competitive assessment of novel glucose monitoring platform

## Therapeutics (Non-Insulin)

- Global product positioning strategy for DPP-IV inhibitor
- Market assessment for beta cell regeneration technologies
- Product lifecycle strategy for TZD (thiazolidinedione) product line
- Transaction diligence for an innovative GLP-1 product
- Go-to-market plan for a novel immune-based therapy
- Clinical trial strategy for disease modifying agent in type 1 diabetes
- Screening assessment of siRNA technology for diabetic indications

## Insulin/Insulin Delivery

- Single-use insulin pump customer analysis and product positioning
- Global insulin market model and lifecycle strategy
- Commercial plan for innovative insulin delivery system
- Monetization path for company with glucose-responsive insulin
- Acquisition diligence on first-in-class insulin patch pump
- Partnership strategy support for insulin device development
- Pricing and reimbursement strategy for novel insulin pump

## Complications

- Pipeline assessment for micro- and macro-vascular complications
- Global sales forecast for resistant hypertension therapy
- Indication prioritization for neuropathic pain development candidate
- Specialty profiling and asset review for gastroparesis
- Renal franchise growth strategy with diabetes segmentation
- Commercial assessment of RAGE and related novel targets
- Development plan to repurpose an agent for macular edema
